

1. cost price = 800

Profit = 20%

Profit = 20% of 800

= 160

SP = 800 + 160

= 960

8. $A = \frac{1}{2} * b * h$

$A = \frac{1}{2} * 14 * 10$

$A = 70 \text{ cm}^2$

~~3 a)~~ $V = u + at$

average velocity = $\frac{u + V}{2}$

$S = \frac{u + V}{2} * t$

Subs $V = u + at$

$S = \frac{u + (u + at)}{2} * t$

$S = \frac{2u + at}{2} * t$

$S = ut + \frac{1}{2} at^2$

2. Label the parts of the animal cell given below.

9. Label the parts of the human digestive system given below.

3 b) $a = \frac{v-u}{t}$
 $a = \frac{20-0}{5}$
 $a = 4 \text{ m/s}^2$

4) ~~mercury~~

4) mercury

10) Dr. Rajendra Prasad

5 a) Structure of ethanol

The functional group $-\text{OH}$ (Hydroxyl)

5 b) magnesium (mg)

Group: 2

Period: 3

Physical property: It is silver white metal

6. `num = int(input("Enter a number:"))`

`if num % 2 == 0:`

`print("Even")`

`else:`

`print("odd")`

7 a) Newton First law

A football lying on the ground will remain at rest until someone kicks it. Once it is moving, it will continue moving until another force, ~~such~~ such as friction or a player stopping it, act on it. This illustrates Newton's first law of motion: an object remains at rest or in uniform motion unless an external force act on it.

7 b) Theory - carbon cycle

Plants take carbon dioxide from the air during photosynthesis. Animals get carbon by eating plants. Respiration and decomposition return carbon dioxide to the atmosphere, completing the carbon cycle.
